

## REVOLUTIONARY PATENTED VISION PICKING SOLUTION

Zero errors and maximum speed with the world's most used vision picking solution

xPick is a patented and an award winning "pick-by-vision" solution. It supports manual order picking, incoming, outgoing and sorting of goods, inventory control, sequencing and many more processes in logistics and warehousing.

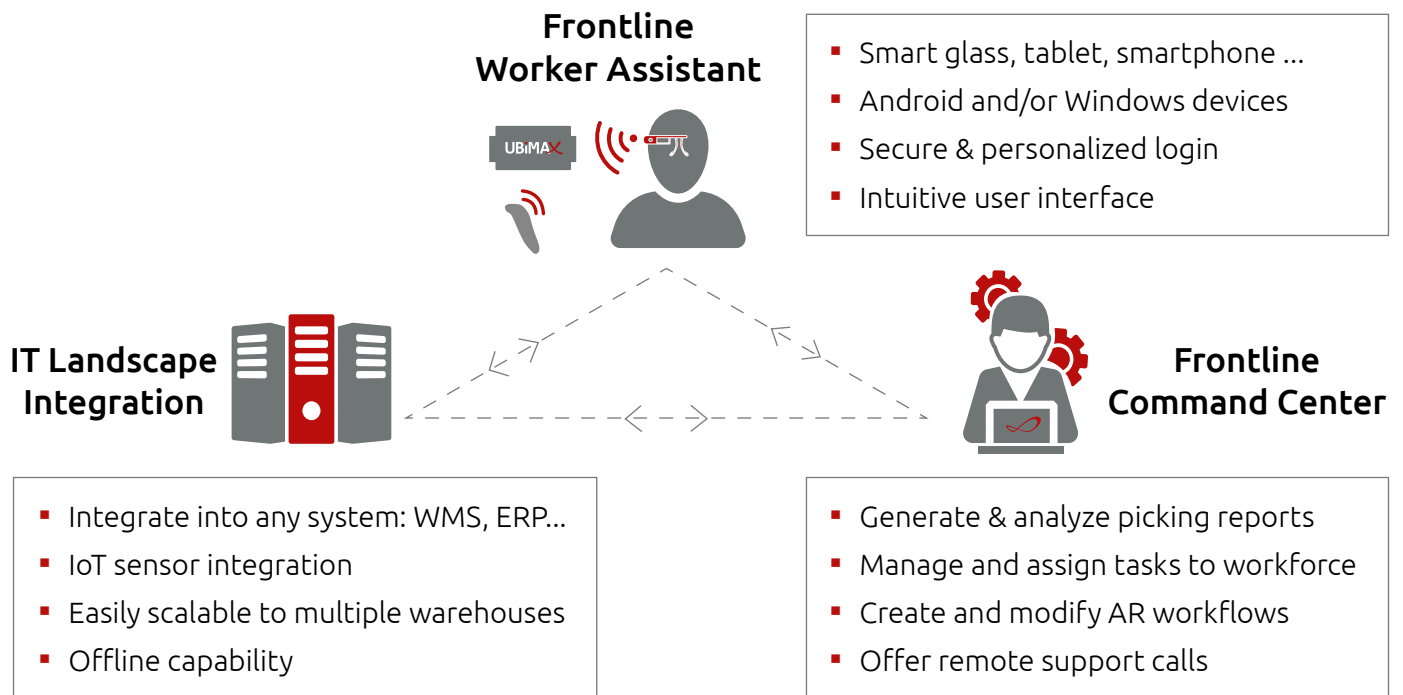

xPick allows for hands-free, high speed order picking while simultaneously reducing the number of picking errors drastically. Error rates can be even further reduced with optional modules e.g. through patented RFID confirmation with xBand, barcode scans, visualization, voice control or image recognition.

User acceptance is outstanding due to the intuitive graphical user interface design. xPick offers enormous customization flexibility and does not rely on any electronics in the environment except Wi-Fi.

### Supported Processes

- **Single- & multi-order-picking**
- **Sequencing & kitting**
- **Incoming & outgoing goods**
- **Packing & sorting**
- **Replenishment & putaway**
- **Inventory control**
- **Value added services**
- **...and many more!**

## Core Features

## Your Benefits

### Faster processes

Hands-free picking and confirmation with up to 43% time savings

### Quick payback

Return on investment within a few months

### Higher accuracy

Nearly zero errors through integrated quality control

### Trusted solution

Industry proven and in productive global use for years

### Greater flexibility

Easy training and fast enablement of frontline workers

### Instant analysis

Central graphical overview of key performance indicators
